

**Client:** Max Zeller Söhne AG, pflanzliche Heilmittel, 8590 Romanshorn  
**Planning:** Büchler+Hiestand AG, Ing.-Büro für Elektrotechnik, 9320 Arbon

**Task:** Combination of distributor and security box UP with different equipment. The following criteria have to be achieved: the external form and appearance have to be identical, stainless material, easily to be cleaned, protected against dust and water jet.

### Build-in combination – seal and pleasant

#### Characteristics:

- Distribution box made of V2A
- Frame with door and seal
- Hard rubber distribution box implemented as installation kit
- The area can easily be cleaned when the distribution box is closed.

- A flap in the door front enables the cable connection when the door is closed.
- Door with a rotary closure

- The installation is made on a grand scale to prevent a cable tangle; so the instruments and equipment can be changed individually.
