

Client: BLS Lötschbergbahn AG, Spiez

Task: Battery powered lights for all inspection- and supervision tasks

Our purpose was to replace the old accumulator lights, which became obsolete, with our new multifunctional light FLASH. We delivered the lamps and the customer was fitting them to the local assembly possibilities.

The optimal cooperation between supplier and consumer!

NEW for OLD!

Our delivery contained:**10 accumulator hand lamps FLASH 10 W / 1,2 W / 12 V with wall charge station****The outstanding characteristics are as follows:**

1. Control desk with clearly arranged, solid function key
2. Degree of protection: of the lamp: IP67, of the wall charge station: IP30
3. Solid polyamide box (yellow) with black baffle
4. Resistant against mechanical and chemical influences
5. Primary light (10W) and secondary light (1,2W) with automatic safety commutation
6. Emergency light in case of mains power failure (intensity/durability eligible)
7. Flexible charging voltage 9 VAC – 28 VAC or 11 VDC – 30 VDC

**The contribution of our customers:**

- Simple, clean and compact installation of the lights by means of aluminium-buses
- Clean assembly of the battery charger leads in a cable conduct system
- Lateral pluggable loading unit with optic signal / supervision
- Quite simply dismantling and installation of the lamp
