

- Client:** Industrielle Betriebe Interlaken
- Task:** Replacement of the existing under-floor illumination system (illumination of the passage) at the Coop Centre, Interlaken-East by GIFAS **FlatLED**
- Object:** Shopping arcade at the Coop Centre, Interlaken-East
- Purpose:** Stylistic under-floor illumination of the shopping arcade with additional function

Illumination of the passage with *FlatLED*

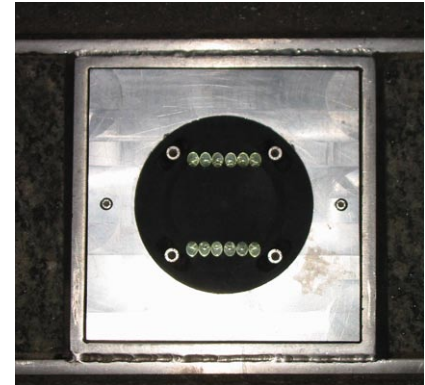

The problem:

The existing illuminations have caused various problems. They were full of water (missing drainage) and did not work anymore.

Our solution:

The positioning light *FlatLED* is installed in a V2A plate in order to be integrated into the existing frame.

Special advantages:

- Flexible adaptation to the edificial environment
- Electronics encapsulated = no water ingress
- No heat development = no condensation water
