

## DeltaLUXX as construction site lighting

The spotlight is highly efficient and provides ideal illumination of the tunnel.

<b>Customer / installation engineer:</b>	Marti AG, Bauunternehmung
<b>Requirement:</b>	Tunnel lighting, shuttering, concrete and floor covering work
<b>Solution:</b>	DeltaLUXX floodlight
<b>Article:</b>	800156
<b>Quantity:</b>	30
<b>Equipment:</b>	200 W/230 VAC, 5'000 K, IP65
<b>Areas of application:</b>	Construction site lighting, workshops, warehouses, outside areas, industrial halls

### Starting situation

There is a 650m long tunnel on the northern bypass (A1) which is used for residential and noise protection. Sufficient light for shuttering, concrete and floor covering work is required during the construction work. It was decided to use the DeltaLUXX 200 for the ground-level lighting.

### Customer benefits

- for application areas with high light point heights
- slim, modern industrial design
- optionally available with lenses for diverse applications
- suitable for use in industrial premises with fire hazards (D rating label)
- 5-year guarantee
