

Court Beam LED

Efficient area lighting for low mounting heights

Product features

The Court Beam LED impresses with its linear asymmetric optics, which produce soft light with improved uniformity. A key advantage of the Court Beam LED is its installation at a height of only about 4 meters – unlike conventional floodlights that need to be mounted on high poles. This allows for easier installation, reduces material and labor costs, and significantly simplifies maintenance. The special design with integrated light control ensures even illumination, providing players with clear visibility. The Court Beam LED combines modern technology, flexible installation and high energy efficiency in a single lighting solution.

- full luminous flux, immediately available
- minimal temperature development
- wide operating temperature range -30°C to $+45^{\circ}\text{C}$
- no UV/IR radiation
- not sensitive to impact and vibrations

Range of application

Appropriate for all locations, that require uniform lighting at a low light point height:

- tennis courts
- multi-purpose sports fields
- training, school and club fields
- facade luminaire for forecourts
- underpasses (corner mounting)

Technical data

Input voltage:	220-240 VAC
System performance:	60W/80W
Luminous flux:	9'000lm/12'000lm
Light efficiency:	up to 150lm/W
Colour temperature:	3'000K
CRI:	Ra>70
Operating life (L80/B10):	>80'000h
Protection category:	IP65
Protection class:	I
Impact resistance:	IK08
Temperature range:	-30°C to $+45^{\circ}\text{C}$
Integrated thermal management:	yes
Housing material:	Aluminium
Housing colour:	grey
Weight:	4.5 kg
Dimensions:	1'511x117x83mm

Assortment

841138 Court Beam LED 60W, 230VAC, 3'000K, 9'000lm, IP65

841139 Court Beam LED 80W, 230VAC, 3'000K, 12'000lm, IP65

Accessories

841144 Connection cable 1 m $3 \times 2.5 \text{ mm}^2$ H05RN-F with coupling

841140 Extension cable 1.5 m $3 \times 2.5 \text{ mm}^2$ H05RN-F with plug/coupling

841142 Pipe bracket A2, $12 \times 300 \text{ mm}$

841143 Bracket
